Hi Jennifer,

I am sorry for my delayed response, I have been out with the flu since last week. DTSC is proposing to conduct a Preliminary Environmental Assessment (PEA) for the soil at the entire Malibu HS campus (including the Middle and Elementary Schools). The soil sampling effort will be similar, but more comprehensive than the work ARCADIS conducted in 2010. We anticipate the sampling methodology will include PCBs, pesticides, metals, and volatile organic compounds (VOCs). Soil sampling may be conducted anytime, with the exception of when the ground is saturated after a larger rain. We have not yet determined the total depth of soil samples at this time. We will keep you and the community posted as we proceed with the planning. Please let me know if you have any questions.

Thank you, Maria
